Make My Day Website

Make My Day is a small family run business who provide affordable and family accessible excursions and days out in the South-West and South-Central region of the United Kingdom. The range of actives that are provided by Make My Day are predominately outdoor adventure actives such as Kayaking, Paddle Boarding and Mountain Biking.

In order to grow and expand their business, Make My Day require a series of simple webpages to advertise their excursions and to provide a platform where their potential clients can establish contact with them to have queries answered. In addition to this, their new website should also provide the ability for clients to browse their available excursions, and to create a user account so that they are able to create bookings to take part in a particular excursion. Though this functionality of their webpage requires the ability to create a booking for an excursion, it does not require any interface for the taking of a payment at this stage.

The brand personality of Make My Day intends to be family orientated and although the nature of the activities they offer will be adventurous, they will be suitable for a wide range of ages. One of the aims of Make My Day is to keep the costs as low as possible and with that as a focus the price range of their products will range from £10 per person up to £40 per person.

Lore Ipsum is simply dummy text of the printing and typesetting industry. Lore Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lore Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lore Ipsum.
